

CADEMUIR ENGINEERING

Innovation & Excellence in Plastic Engineering

Providing precision plastic injection moulding and tooling since 1979

www.cademuir.co.uk

Who We Are:

At Cademuir Engineering, our state-of-the-art facilities and unwavering commitment to quality make us the perfect partner for your needs. We specialise in helping our customers take their product ideas to market with unrivalled speed and efficiency.

Whether you're launching a new venture, scaling production or relocating manufacturing, our experienced team offers reliable, friendly support.

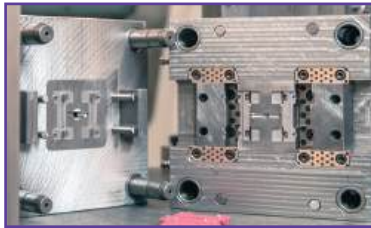

Our Services:

Design & Development

Our expert engineers support you from concept to production, offering design review, material selection, part sourcing, specification writing, and more. Using the latest CAD/CAM and mould flow analysis software, 3D printing, and rapid aluminium tooling, we quickly refine and realise your designs for success.

Toolmaking

With a dedicated toolroom, Cademuir Engineering lead in the design, manufacture and refurbishment of high-precision tools for producing accurate moulded plastic parts. From Soft Tooling to P20, and fully hardened steel, our expertise ensures superior quality and performance.

Injection Moulding

Our team specialises in high-quality plastic injection moulding solutions for a wide range of applications. Our state-of-the-art machines, ranging from 10 to 250 tons, produce everything from intricate parts to large-scale components in various materials and colours. We also offer overmoulding and insert moulding to meet your specific requirements.

Automation & Robotics

Utilising advanced automation and robotics, we optimise production efficiency and precision in every stage of manufacturing. Our integrated systems ensure consistent quality and faster turnaround times for your projects.

Secondary Services

From part assembly to product labelling, printing, and packaging, we can help streamline production with a wide range of secondary services. We also offer comprehensive testing to ensure your products meet the highest standards of quality and performance.

Logistics & Supply

We work with you to customise storage and delivery to your needs, supporting seamless supply and uninterrupted production. We can hold manufactured stock for you to call-off as needed, provide on time and line side delivery, and offer in-house sub assembly services.

Reshoring

Considering moving your plastic injection moulding to the UK? We help clients to reshore their manufacturing for greater flexibility, enhanced quality control, and reduced lead times. Our expertise ensures a seamless, efficient, and cost-effective transition for bringing your tools and production closer to home.

Machining, Jigs & Fixtures

Our fully equipped machine shop, with CNC milling machines, lathes, spark erosion, and 3D printers, specialises in precision tooling, and custom jigs and fixtures. With our vast machine capacity, we ensure quick turnaround times and uncompromised quality.

Industries We Serve:

From large firms to individuals wanting to develop a new product, here at Cademuir Engineering we support clients in a wide variety of sectors including:

Medical & Pharmaceutical

Farming & Agriculture

Purification & Filtration

Fixtures & Fittings

Household & Leisure

Industrial

Electronics

Cademuir Engineering provides complete peace of mind with reliable precision plastic injection moulding and tooling. Quality Assurance: ISO 9001:2015 certified.

Why Choose Cademuir Engineering?

Experience and Expertise:

Over 45 years experience and expertise in toolmaking, machining, and precision engineering.

Advanced Facilities:

State-of-the-art equipment, 10 to 250 ton machines, automation and robotics, and a new, expansive 26,000 sq. ft. factory for enhanced production capabilities.

Quality Assurance:

ISO 9001:2015 certified, guaranteeing the highest quality products through standardised processes and continuous improvement.

Customer-Centric Approach:

Dedicated to understanding and meeting the unique needs of each customer, ensuring timely and efficient service.

Environmental Responsibility:

ISO 14001 certified, committed to environmental management and sustainability, and promoting the use of recycled and biodegradable plastics wherever possible.
